# Biodegradable Urns

## Sand Ocean Urns

Produced using a clay-like material to create an attractive and environmentally friendly urn.

Real beach sand is applied to the exterior surface of the urn. The Urns can be retained safely at home if kept dry, and can also be used to bury cremated remains at sea or in running water.

The urns have holes in the bottom, allowing water to enter, and are designed to float briefly and dissolve completely within four hours when placed in water. They are supplied with biodegradable water-soluble bag into which ashes are placed.

**Capacity: 200cu" (3.27L).**

**Dimensions: 23.5cm high x 19cm wide**

**£130**

## Journey Urns

Hand-crafted from sustainably produced, biodegradable paper. Suitable for burial or temporary storage of cremated remains, or burial at sea or in running water.

If placed in water the Urn will float briefly then sink to the bottom, where it will break down naturally over time. Supplied with biodegradable water-soluble bag into which ashes are placed.

Urn may vary slightly in size, shape and appearance.

Larger Urn Capacity: 220cu" (3.61L).  
Dimensions: 31.5cm x 35.5cm x 7.5cm.

**£55**

Smaller Urn Capacity: 60cu" (0.98L).
